

HONEYWELL INCREASING SUPPORT OF TURKISH AUTOMOTIVE MARKET

Honeywell Transportation Systems Aftermarket Shows Original Equipment Expertise and Dedicated Service Model for Turkey at 2014 Automechanika Istanbul

ISTANBUL -April 10, 2014 - Honeywell (**NYSE:HON**) Turbo Technologies, a leading global automotive technology and original equipment provider, will be showcasing its range of automotive turbocharger applications for the Turkish aftermarket at Automechanika Istanbul 2014.

Honeywell is returning to this key trade fair for the second consecutive year which offers a valuable opportunity for automotive technology leaders to expand their network and share their expertise and knowledge of Honeywell turbos including its Garrett aftermarket brand

As a company, Honeywell is committed to bringing its core competencies for technology innovation to Turkey to offer the products and solutions which enhance our standard of living in areas such energy conservation as well as safety and security,said Orhan Genis, president of Honeywell Turkey and Central Asia. "Since 1992, Honeywell Turkey has been a key contributor in automation and control solutions for residential, building and industrial markets as well as other industries. Our Transportation Systems business has become a major player with its aftermarket activities to upgrade the availability of reliable, quality replacement parts in Turkey and the region for a rapidly growing automotive market.

At Automechanika, Honeywell will be highlighting key turbocharger products from its expanding commercial vehicle and gasoline application portfolio and key initiatives including its 'Insist on Genuine' campaign. This Honeywell initiative showcases Garrett turbochargers and how they meet the specifications of all original car and truck manufacturers making them a safe and high quality alternative to copy turbos, which run the risk of poor performance, high fuel consumption and increased emissions.

Since first coming to the show last year, Honeywell has also established a number of Garrett Authorized Centers in Turkey as planned to facilitate the availability of genuine Garrett aftermarket parts, as well as training and service resources for its extended distribution network.
