

Garrett® GTX-R Turbochargers

The next step in the evolution of the turbocharger is here! Garrett® GTX-R Turbos feature all new compressor wheels with next generation aerodynamics and improved efficiency to deliver wicked performance!

Garrett® GTX-R Turbochargers provide higher flow and greater boost pressure ratios beyond the world-class Garrett GT Series compressor wheels.

- 10%+ Gain in flow over traditional GT compressor wheel designs
- 10%+ Higher pressure ratio compared to traditional GT compressor wheel designs
- Forged, fully machined wheels (billet) for expedited release
- 11 Full-blade design for improved efficiency and ultra quiet operation
- Outline interchangeable with Garrett® GT Series turbos
- Garrett® OE-quality for unbeatable reliability

Garrett GTX-R turbochargers will be available through Garrett® Performance Distributors and Garrett® Master Distributors in early 2010.

Initially available will be:

- GTX4294R (map below)
- GTX4202R
- GTX4508R

More models available soon!

The map below clearly shows the gains made in compressor wheel technology over three generations of similarly-sized turbos, from T-Series, through GT and now GTX.

Take the next step in turbocharging:
