

Charles Jin
President, High Growth Regions, China & India
Garrett - Advancing Motion

Charles Jin is president of high growth regions, China and India, for Garrett - Advancing Motion, a global leader in turbocharging technologies, electric products and automotive software. He takes full responsibility for the profit and loss (P&L) of high-growth regions, and is committed to achieving key financial targets in alignment with global strategies, targeting strong growth in existing turbo businesses, and expanding electrified products and connected vehicle technology.

Jin directs overall business strategies in high-growth regions and sets high standards for implementation and execution of business strategies in local markets. He leads an integrated organization with capabilities ranging from marketing, sales, finance, research & development, engineering, and integrated supply chain (ISC) to local supply chain and quality, aiming at delivering high-quality end-to-end service and maintaining customer loyalty. He also effectively manages local leadership teams.

Before the spinoff of Garrett, Jin joined Honeywell Transportation Systems in 2012 as a general manager in China and was named vice president in 2014. He became vice president and general manager of high growth regions in 2017. Before joining Honeywell, he served as the managing director of Kohler China. He also had various critical roles in world-class automobile and parts companies, including Eaton, TRW Automotive and TI Automotive.

Jin graduated from University of Science and Technology Beijing, majoring in mechanical engineering. He is based in Shanghai and reports to Garrett President and CEO Olivier Rabiller.
