

Daniel Deiro

**Vice President, Global Customer Management and General Manager, Japan & Korea
Garrett - Advancing Motion**

Daniel Deiro is vice president of global customer management and general manager of Japan and Korea for Garrett - Advancing Motion, a global leader in turbocharging technologies, electric products and automotive software. Deiro is responsible for leading the commercial, program management and applications engineering teams dedicated to world-class customer satisfaction.

Deiro manages finances and develops and oversees the execution of the company's strategy for all its customers worldwide. Deiro plays a crucial role in building the future for Garrett through strong customer relationships with senior-level client executives. His objective is to maintain Garrett's reputation, provide unparalleled customer satisfaction, and lead the customer management teams to continually build and strengthen the company's brand, volume and market share growth.

Deiro creates and executes technology, customer and product-specific business plans, strategic selling programs, and account management practices to take advantage of market opportunities. He has brought valuable experience in sales, senior management and leadership to Garrett from his experience in customer-centric roles within Honeywell Transportation Systems over the past 12 years. Before that, he spent nine years at ThyssenKrupp Presta, where he was the account director for FIAT, GM and TRW.

Deiro holds a car mechanical certificate and a degree in automotive mechanical engineering with a specialty in thermodynamics from Swiss University in Biel, Switzerland. He's fluent in French, Italian, German and English. He is based in Rolle, Switzerland, and reports to Garrett President and CEO Olivier Rabiller.
