

Pierre Barthelet
Senior Vice President, Commercial Excellence and Strategy
Garrett - Advancing Motion

Pierre Barthelet is senior vice president of commercial excellence and strategy (CE&S) for Garrett - Advancing Motion, a global leader in turbocharging technologies, electric products and automotive software. Barthelet ensures the Garrett organization acts with speed, agility and customer focus.

In addition, Barthelet is responsible for developing and deploying the commercial growth and profitability strategy for Garrett, leading the development of new growth vectors, and driving commercial and functional excellence.

Through the leadership of a global team that identifies market trends, Barthelet maximizes the performance of Garrett's business portfolio and develops the company's product offerings.

Before the spinoff of Garrett, Barthelet served in the same role for Honeywell Transportation Systems. He joined Transportation Systems in 2001 as the product engineering manager for electric boosting and has since held several positions of increasing responsibility. These included global performance and system simulation manager, program manager, engineering and product management director for light vehicle diesel, and, more recently, China engineering director.

Barthelet holds a master's degree in aeronautics from Ecole Nationale Supérieure de l'Aéronautique et de l'Espace and a Ph.D. in fluid dynamics from Institut National Polytechnique, Toulouse, France. He is based in Rolle, Switzerland, and reports to Garrett President and CEO Olivier Rabiller.
