

CORPORATE OVERVIEW

Garrett Motion is a differentiated technology leader, serving customers worldwide for more than 65 years with passenger vehicle, commercial vehicle, aftermarket replacement, and performance enhancement solutions. The company's cutting-edge technologies enable vehicles to become cleaner, more efficient and connected. With a comprehensive portfolio comprised of turbocharging, electric boosting, fuel cell and software solutions, Garrett empowers the global automotive industry to redefine and further advance motion.

LEADING TECHNOLOGY INNOVATOR

Garrett is a pioneer in turbocharging systems for a wide range of engine applications and is leveraging its differentiated technology expertise into new and unsolved realms of automotive technology with e-motor applications. Building on decades of innovation in the mechanical domain and advanced capabilities in high-speed electrification, Garrett develops in-house electric-boosting technologies for use in electrified powertrains, including hybrid and fuel cell vehicles. In 2022, the company launched the industry's first "E-Turbo" for passenger vehicles on the Mercedes-AMG model SL 43. Additionally, Garrett's differentiated automotive software solutions address global macro issues including leading cybersecurity, energy management and guided diagnostic technologies to ensure a secure and safe operating environment and transition to electrification.
