

## CORPORATE OVERVIEW

**Garrett Motion** is a differentiated technology leader, serving customers worldwide for more than 65 years with passenger vehicle, commercial vehicle, aftermarket replacement, and performance enhancement solutions. The company's cutting-edge technologies enable vehicles to become cleaner, more efficient and connected. With a comprehensive portfolio comprised of turbocharging, electric boosting, and software solutions, Garrett empowers the global automotive industry to redefine and further advance motion.

## LEADING TECHNOLOGY INNOVATOR

Garrett is a pioneer in turbocharging systems for a wide range of engine applications, including gas, diesel, and natural gas. Building on its expertise in the mechanical domain, Garrett has developed in-house electric-boosting technologies for use in electrified powertrains, primarily hybrid and fuel cell vehicles. In 2022, the company launched the industry's first "E-Turbo" for passenger vehicles, on the Mercedes-AMG model SL 43. Garrett is today leveraging its unique capabilities and deep-seated relationships with all major OEMs to introduce automotive software solutions addressing global macro issues. The company's leading cybersecurity, energy management and guided diagnostic technologies help to ensure a secure and safe operating environment and transition to electrification.
