LEADING EMISSION-REDUCING AND ZERO-EMISSION TECHNOLOGIES

As a trusted expert in emission reduction and energy efficiency technologies, Garrett pioneers innovation in the automotive sector (passenger and on-highway commercial vehicles) and beyond (off-highway equipment, marine, power generators). We develop the world’s most advanced turbochargers and electric boosting technologies for hybrids and electrified powertrains.

Building on decades of innovation, we have developed advanced in-house capabilities in turbo machines for air compressors, high-speed electric motors, power electronics and control software. Our expertise in turbocharging has enabled significant reductions in engine size, fuel consumption, and CO2 emissions. Garrett is expanding its positive impact by developing differentiated technology solutions for Zero Emission Vehicles, such as Fuel Cell Compressors for hydrogen Fuel Cell vehicles and electric propulsion and thermal management systems for battery electric vehicles.

DIVERSIFIED AND GLOBAL REVENUES
